FORMETAL

The Easy Way to Three-Dimensionality

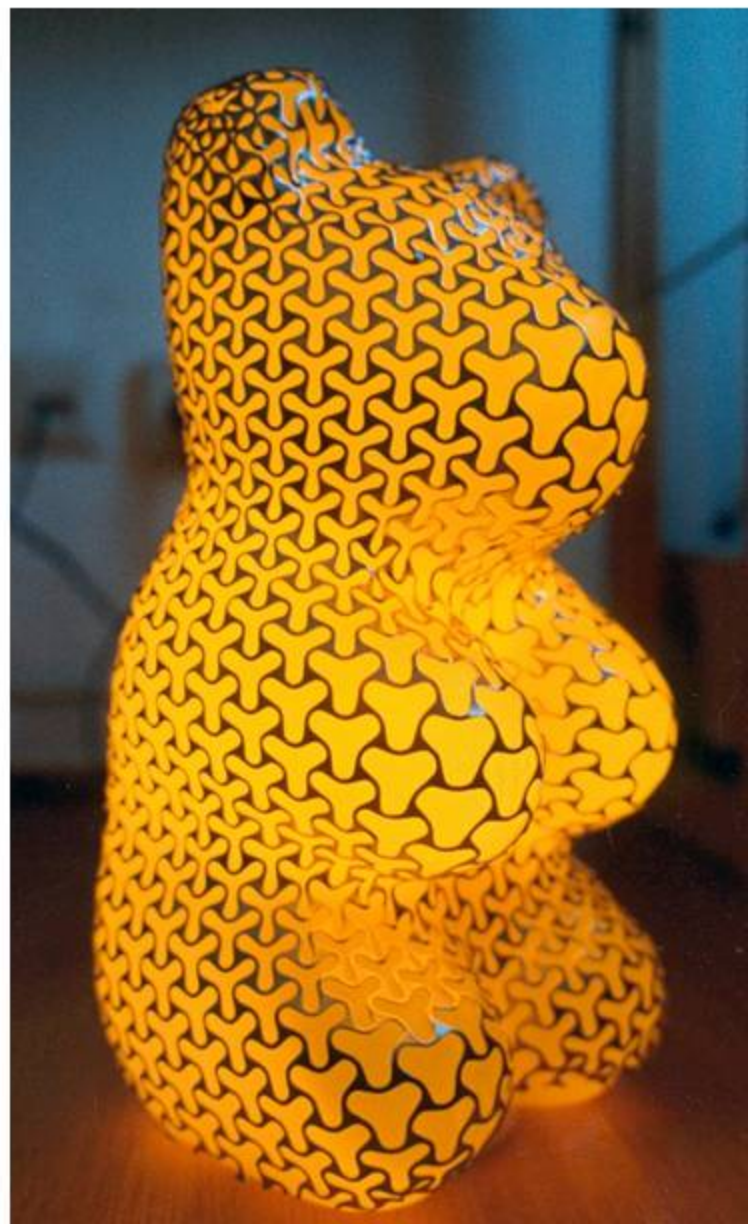

THE INVENTION

- **1995:** First invention
- **6.12.1995:** European Patent
- **1999:** Further development

History - The idea behind Formetal

- First flat metal for three-dimensional forming by hand
- Revolutionary 3D forming with even surface
- Three star pattern
- Reshapable
- „World of Forming“
- Simplicity of structure
- Flexibility + cost saving

This is what makes Formetal unique

- Formetal combines all classical metals: punch sheet metal, stretch metal and wire grating
- Further development of all 3 customary metals
- Effortless shrinking and stretching
- Decorative
- Multi-functional
